

# Biography

**Stephen Pumble, MEng., MBA**  
**Chairman and CEO**  
**AZCAR Technologies Inc. (parent of Megahertz Broadcast Systems Limited)**

**Stephen Pumble** is the founder of AZCAR Technologies Incorporated. He is a consummate leader and one who actively guides and directs the company's overall strategy and operations.

Stephen has over three decades of hands-on broadcast design and implementation experience that he has gained from working with broadcasters, media owners and telecommunications companies in many parts of the world.

Stephen is a Fellow of the Society of Motion Picture and Television Engineers (SMPTE), a member of the Association of Federal Communications Consulting Engineers (AFCEE), an author in several trade publications and a speaker at industry conferences.

**Megahertz Broadcast Systems Ltd** is the European home of the AZCAR Group - one of the world's largest and longest-established independent broadcast systems integrators. For over 25 years, MHz has been designing and delivering innovative turnkey solutions for the world's leading broadcasters, telecommunication and digital media companies. From server-based production studios, multi-channel playout systems and high-definition OB vehicles to the build out of entire earth stations, MHz offers a complete service to meet the business and operational requirements of its customers. Furthermore MHz's impartial advice and proven expertise — from conception, implementation to final commissioning, support and training — is second to none. Quality in-house coach building and furniture design and manufacture, provide value added services that are available to every customer at our extensive pre-build facilities. Additional information about MHz is available at [www.megahertz.co.uk](http://www.megahertz.co.uk)
